Mahmoud Hussein Abd El-Mawjoud
Full-Stack Developer

GitHub: https://github.com/mahmoud-Eng1| **Phone:** +20-1555122300
Email: mahmoudhussein0049@gmail.com | **WhatsApp:** +20-111-429-7618

Objective

Results-driven Full-Stack Developer with hands-on experience building secure, scalable, and high-performance web applications using Node.js, Express.js, MongoDB, React.js, and Next.js. Skilled in architecting RESTful APIs, implementing robust authentication/authorization flows (JWT, Refresh Tokens, RBAC), and applying industry-standard API security best practices. Passionate about writing clean, maintainable, and production-ready code.

Skills

- **Languages:** JavaScript, TypeScript
- **Backend Development:** Node.js, Express.js, RESTful APIs, MongoDB, Mongoose, MySQL
- **Frontend Development:** React.js, Next.js, HTML5, CSS3
- **Styling & UI:** Tailwind CSS, Bootstrap
- **Security & Auth:** JWT, Refresh Tokens, Role-Based Access Control (RBAC)
- **Tools & DevOps:** Git, GitHub, Docker

Projects

Daar-El Teb System (Hospital Management System)

Backend Developer | GitHub Repository *(https://github.com/mahmoud-Eng1/Daar-el-teb-system)*

- Engineered a comprehensive backend system to streamline hospital operations, managing patients, doctors, nurses, departments, appointments, rooms, and staff assignments.
- Built scalable database schemas using MongoDB and Mongoose to ensure optimal data consistency.
- Secured the application by implementing JWT authentication and strict Role-Based Access Control (RBAC) for different user tiers.

Nova-Shop (E-commerce API)

Backend Developer | GitHub Repository *(https://github.com/mahmoud-Eng1/Nova-shop)*

- Developed a robust E-commerce backend API supporting full product management, inventory tracking, and order processing operations.
- Integrated Stripe payment gateway securely to handle seamless checkout and user transactions.
- Implemented secure token-based authentication using JWT to protect user profiles and order histories.

  Amazon Clone
  Full-Stack Developer | Live Demo/GitHub *(https://github.com/mahmoud-Eng1/amazon-app)*

- Built a responsive frontend E-commerce web application mirroring core Amazon features using React.js.
- Integrated Firebase Authentication for secure user onboarding and session management.
- Implemented end-to-end Stripe payment integration for simulated safe checkout flows.

  TechStore
  Frontend Developer | Live Demo/GitHub *(https://github.com/mahmoud-Eng1/TechStore)*

- Designed and developed a modern, fully responsive E-commerce web platform optimized for laptop and tech retail.
- Created dynamic user interfaces using React.js, ensuring fast rendering and smooth user experience.

  Portfolio Website
  Frontend Developer | Live Demo/GitHub *(https://github.com/mahmoud-Eng1/portfolio)*

- Developed a personal portfolio website utilizing Next.js to showcase technical projects and skills.
- Optimized for performance, SEO, and clean UI responsiveness across all screen sizes.

Languages

- **Arabic:** Native
- **English:** Very Good
